SKILLS

Programming

Go
Rust
TypeScript
Python
C++
Ruby

DevOps & Cloud

Kubernetes
Terraform
AWS
GCP
Cloudflare
Docker
Prometheus

Domain Knowledge

Distributed Systems
Platform Engineering
WebAssembly
Edge Computing
API Design

Soft Skills

Technical Leadership
Cross-functional Collaboration
Mentoring
Public Speaking

Languages

English (Native)
Spanish (Fluent)
Portuguese (Conversational)

VALUES

Reliability over velocity
Developer experience first
Radical transparency
Continuous learning

HOBBIES

Open-source contributing
Trail running
Specialty coffee

Marcus Rivera

Senior Product Engineer

San Francisco, CA

SUMMARY

Product-focused engineer with 8 years building developer tools and infrastructure at scale. Passionate about bridging the gap between platform engineering and product experience. Known for shipping reliable systems quickly and mentoring high-performing teams.

MOTIVATION

Driven by the belief that great infrastructure should be invisible — enabling teams to ship confidently without thinking about the platform underneath. Seeking a role where I can combine deep technical work with cross-functional product leadership.

EXPERIENCE

- Stripe, Staff Software Engineer** Mar 2021 — Present
San Francisco, CA
Developer Platform — Payments Infrastructure
 - Led redesign of Stripe's webhook delivery system, reducing p99 latency by 62% and achieving 99.999% delivery reliability across 4B+ events/month
 - Architected a *zero-downtime* migration of 40M merchant accounts to a new identity model over 18 months
 - Built internal load-testing framework used by 12 teams, eliminating 3 production incidents per quarter on average
 - Grew and managed a sub-team of 5 engineers; 2 promoted to senior within 18 months
- Cloudflare, Senior Software Engineer** Jun 2018 — Feb 2021
San Francisco, CA
Workers Platform
 - Core contributor to Cloudflare Workers runtime; implemented Durable Objects storage primitives adopted by 50K+ developers
 - Reduced cold-start time by 45% via V8 snapshot optimization and pre-warming scheduler
 - Designed and shipped the Workers KV consistency model, enabling strong reads without sacrificing throughput
- Heroku (Salesforce), Software Engineer** Aug 2016 — May 2018
San Francisco, CA
 - Maintained the Heroku Router — the critical HTTP layer serving 500M+ requests/day
 - Migrated routing layer from Ruby to Go, improving throughput by 3.2× with 40% lower memory usage
 - Contributed to open-source buildpack ecosystem; PRs merged into 6 official buildpacks
- Carnegie Mellon University, Master of Science in** Aug 2014 — Dec 2016
Pittsburgh, PA
Computer Science
 - GPA: 3.92/4.00

Mechanical keyboards

HONORS & AWARDS

Stripe Maker Award 2023
Stripe Inc. — awarded to top 1% of engineers annually

Best Paper — SREcon Americas 2022
USENIX — for work on webhook delivery reliability

Outstanding TA Award 2016
CMU School of Computer Science

COURSES

Certified Kubernetes Administrator (CKA) 2022
Linux Foundation

AWS Solutions Architect — Professional 2021
Amazon Web Services

Google Cloud Professional Data Engineer 2020
Google
